

# **2013-14 Culver/East Main Traffic Analysis and Report**

by Nicholas Yager, Tom Hartvigsen, Matthew Taylor

Group Name: "Three Degrees of Freedom"

March 16, 2015

---

## **Introduction**

Since the mid-1990's there have been numerous strides in the development of metrics to describe certain evident driving phenomena, i.e. traffic or congestion. Loop detectors quickly became a favorable and cost effective solution to allow civil engineers the ability to monitor and quantify traffic conditions for various intersections.
